

Empowering Clinicians with Diagnostic Assurance

Assurance works with hundreds of medical practices, nursing homes, and hospitals in Alabama to help improve patient outcomes and reduce antibiotic resistance. We provide fast and reliable diagnostic testing using PCR and traditional microbiology to identify specific pathogens. This arms clinicians with the data needed to prescribe the most appropriate treatment.

Current Panels	
COVID-19 Only	Vaginitis
COVID Respiratory Lite	Sexually Transmitted Disease
COVID Respiratory	Gastrointestinal
COVID Respiratory Plus	Fungal Infection
Urinary Tract Infection w/ ABX Resistance	Candida
Urinary Tract Infection Plus	Antibiotic Resistance
Wound/Derm w/ ABX Resistance	Antimicrobial Susceptibility Testing

HOW ASSURANCE CAN HELP

Our testing solutions were designed with your needs in mind.

- We provide all supplies needed for specimen collection.
- We provide courier pick-up or overnight specimen shipping to our lab for processing.
- Results are available via online portal and fax.
- Culture and Antibiotic Sensitivity testing is available.
- Sales and account representatives, scientists, and billing specialists are available to answer questions.

WHY IS IT IMPORTANT?

The accuracy of PCR testing can help prevent the spread of many illnesses, while improving patient outcomes and enhancing patient satisfaction.

It has never been more critical to correctly diagnose. Patients want answers...accurate answers. Providing them with the most reliable testing available delivers value to you and your patients. Let us help you offer diagnostic assurance.

WHY WE DO WHAT WE DO

Two words: antibiotic stewardship. Antibiotic stewardship is the effort to promote the appropriate use of antibiotics, improve patient outcomes, and combat antibiotic resistance. With the accuracy of PCR testing, your diagnosis and treatment plan will hit the target the first time, helping your patient get better faster and stay better.

1 in 3

antibiotic prescriptions are unnecessary, according to the CDC.

2 million

Americans become infected with bacteria that are resistant to antibiotics annually.

WHAT OUR CLIENTS ARE SAYING

“ PCR testing through Assurance Scientific Labs has proven very valuable to me and my patients. I can tell them in roughly 24 hours not only whether their respiratory infection is bacterial or viral in nature, but also inform them in many cases which virus or bacteria is causing their illness. ”

- Physician from Aliceville, AL

“ As a small business owner, I have found Assurance to be one of my most customer-friendly, accommodating, and dependable vendors. Their efficiency is praiseworthy and worth bragging about. I look forward to a lifelong relationship with them and would refer any medical practice to them. ”

- Physician from Huntsville, AL

THE ASSURANCE PROCESS

1. EASY ORDERING

Choose from one of our panels or pick individual pathogens.

2. SAMPLE COLLECTION

All facilities are stocked with lab supplies, requisition forms, specimen bags, and a PCR Manual with customer service information and instructions on collection/shipping.

3. FAST, ACCURATE TESTING

We use real-time qPCR testing to quickly and accurately identify the patient's specific infection.

4. EASY TO UNDERSTAND LAB REPORTS

These reports show detected infections and guide providers to the appropriate treatment.

5. INSURANCE & BILLING

We bill insurance and patients can contact us directly with any billing questions.
